About five miles from the screw, a place which looked as if cotton had been unloaded was found by some of the searchers, but up to latest accounts no trace of the other missing bale could be found.

Perhaps no citizen of our town was better acquainted with the history of Winnsboro than o'd Adam. He came to this place in 1813 a mere lad, and had lived here continually ever since. He had a remarkably memory, remembering the merest details of happenings in and around the town for over half a century. To

illustrate his wonderful memory, we have only to say that he hauled the town clock from Charleston, and re membered the weight of almost every article connected with it. He was respected by both races, and all will join with us in saying "peace to his THE COLD SNAP .- It is a rare thing

J. W. BOLICE Winasboro, S. C., April, 1883.

Mr. Boag: You wish to know what I have to say in regard to the Davis Machine bought of you three years ago. I feel I can tsay too much in its favor. I made about \$80 within five months, at time, running it so fast that the needle would get perfectly hot from friction. I feel confident I could not have done the same work with as much ease and so well with any other machine. No time was lost in adjusting attachments. The lightest running machine I have ever eadled. Brother James and William's ramilies are as much pleased with their Davis Machines bought of you. I want no better machine. As I said before, I don's think too much can be said for the Davis Machine.

Respectfully, MULIN STEVENSON Fairfield county, April, 1883.

Mr. Boag: My machine gives me perfect esti-faction. I find no fault with it. The attachments are so simple. I wish for ne better than the Davis Vertical Feed.

Boar some three years ago, and it having given me perfect satisfaction in every respect as a family machine, both for heavy and light sewing, and never needed the least repair in any way, I can cheerfully recommend it to any one as a first-class machine in every particular, and think it second to none. It is one of the simplest machines made: my children was it simplest machines made; my children use it with all ease. The attachments are more easily adjusted and it does a greater range of work by means of its Vertical Feed than any other machine I have ever seen or used.
